INDEX TO VOLUME XIX.

A.

Academy of Natural Sciences of Philadelphia, notice of, 88, 355.
Adulterations in chemical substances and medicines, 70.
Aix waters, sulphuric acid from, 176.
Albany Institute, transactions of, 173, 360.
Alcohol, impurities in, 71.
Aldebaran, occultation of, 169.
Almond, bitter, 384.
American Annals of Education, &c. 174.
——— steel, 175.
Ammonia, impurities in, 72.
Animals, rules for the preservation of, in Nat. Hist., 52.
Annals of education and instruction, 357.
Anthophyllite, hydrous, of Dr. Thomson, 359.
Anthracite region in Pennsylvania, 1.
Aqueducts, Roman, 389.
Aranea aculeata, 61.
Arsenic, tests for, 339.
Arrow root, impurities in, 72.
Arts, Chemistry of, 362.
Aurora borealis, essay upon, 235.

B.

Barley sugar, crystallization of, 177.
Barn Swallow, 172.
Bedford and Bath springs, (Pen.) 97, 204.
Beet sugar, 203.
Bertero, Dr., on the plants of Chile, 63, 299.
Binomial theorem, demonstration of, 50.
Birds, preservation of, in Nat. Hist. 52.
Blasting rocks, 199.
Blood, coloring matter of, 381.
Boring for salt water, 203.
Bottles, strength of, 196.
Bowditch, N., translation of the Mecanique Celeste by, 202.
Bromine, atomic weight of, 383.
——— discovery of, in the Baltic, 382.
Brown, J. B. on a singular impression in marble, 361.
Brown, Lt. on the relative strength of certain kinds of timber, 228.

C.

Calomel, impurities in, 72.
Camphor, 380.
Caoutchouc, method of working, 195.
Cast steel, fabrication of, 284.
Cement from iron filings, 190.
Central forces, 46.
Chart of Long Island Sound, 163.
Chemistry, elements of, a new work, 343.
Chemistry of the arts, 362.
Chile, on the plants of, 63, 299.
Chimnies, mode of extinguishing, 186.
Chloride of lime in U. S. Navy, 164.
——————— bleaching rags, 166.
———————, disinfecting powers of, 177.
Chloride of soda, use of, 365.
Chlorine, phosphorus and sulphur, a new compound of, 382.
Chromate of lead, impurities in, 73.
Clemson, T. G., on the Hartz, 105.
Coal measures in New York, 326.
——————— Pennsylvania, 21.
Coal mine on fire, 386.
Common salts, detection of impurities in, 178.
Comstock, Dr. on explosions in blasting rocks, 199.
Comstock, Dr. on the steam boiler, 176.
Copaiva, impurities in, 73.
Crystallization, tendency of salts to, 381.
Cuvier, Baron, memoir of Count Rumford by, 28.

D.

Darlington, Dr. notice of the Encyclopedia of plants by, 160.
Decrepitation of common salt, 198.
Diamond mines in Russia, 199.
Disinfecting powers of Chloride of Lime, 177.
Dyspepsia, Prof. Hitchcock on, 167.
Dix, Miss, on Aranea aculeata, 61.

E.

Earth, magnetism of, 398.
Eaton, Prof., on the coal region of New York and Pennsylvania, 21.
Editor on the anthracite of Penn., 1.
——— his elements of Chemistry, 343.
——— the safety of steam boats, 143.
Electric currents, shocks by, 180.
——— pile, theory of, 375.
Electro-magnetic experiments, 329, 399.
Elements of Chemistry, notice of, 343.
Encyclopedia of plants, 161.

F.

Faust, E., on adulterations in chemical substances, 70.
Feuchtwanger, Dr. L., on tests for arsenic, 339.
Fever, Dr. Smith on, 363.
Finch, J. on the mineralogy of St. Lawrence county, 220.
Fishes, rules for the preservation of, 52.
——— memoir on the nerves of, 387.
Fluids, immiscible ones, 391.
—— revolving motion in, 391.
Flying in the air, 395.
Forman, J. on salt formations, 141.
Formic acid, the production of, 374.
Fulminating silver, 379.

G.

Gale, Dr. on the preparation of potassium, 205.
Gases, expansion of, 397.
Geology, 380.
——— of the Hartz, 108.
Germination upon mercury, 202.
Gould, David, his demonstration of the binomial theorem, 50.
Greece, mode of farming in, 193.
Guernsey, J. A., on a mastodon tusk, 358.

H.

Haematite of Salisbury, 323.
Hail, formation of, 396.
Hare, Dr., description of his Laboratory, 21.
Hare Dr., his new pyrophorus, 173,
Hartz, mineralogy and geology of, 105.
Hay changed to siliceous glass by lightning, 395.
Hayden, Dr. on mineral springs in Penn. 97.
Heat, lightning, nature of, 187.
Heat of Planetary space, 377.
Henry, Prof. J. electro-magnetic experiments by, 399.
Hitchcock, Prof. lectures on Dyspepsia by, 167.
Holmes, Dr. notice of hydrous Anthophyllite of New York by, 359.
Homogeneous and heteromorphous compounds, 383.
Hydrophobia, 214.
Hydrostatic balance, 185.
——— press, 185.
Hygiéne, lectures on, 195.

I.

Iodic acid combined with vegetable alkalies, 371.
Iodide of potassium, impurities in, 74.
Iodine, atomic weight of, 383.
Indian corn, origin of, 186.
Infants, mortality of, 192.
Insects, mode of preserving, 213.
Iron filings, cement from, 190.
—— meteoric, of Bohemia, 384.
—— preservation of from rust, 203.
—— pyrites, white and common, 387.
—— works of Salisbury, 322.

J.

Johnson, E. F. on land surveys, 131.
——— R. Prof. on steam, 292.
Joslyn, B. F. on magnetism, 398.

K.

Kendall, T. improvements in Surveyor's compass by, 317.

L.

Labarraque's mode of using chloride of soda, 365.
Laboratory of Dr. Hare, 26.
Land surveys, 131.
Lead, red, 370.
Lehigh rail road, 9.
Lemon juice, impurities in, 75.
Lightning rods, 186.
Lighting, economic mode of, 383.
Living molecules, 393.
Long Island Sound, chart of, 153.
Lyceum of Nat. Hist. of New York, proceedings of, 159, 353.

M.

Madrid, science in, 144

Magnesium, 197, 379.
Magnetic needle, variation of, 189.
Magnetic needle influenced by aurora borealis, 246.
Magnetism, produced by friction, 394.
——— causes of, in the earth, 398.
Mammoth, notice of, 388.
Marble, regular impressions on, 361.
Mastodon, near Rochester, 358.
Mauch Chunk, geology of, 1.
Mecanique Celeste, translation of, 202.
Mercury, peroxide of, adulterated, 80.
Metals, reduction of by azote, 371.
Metallicity, determination of, 57.
Meteoric iron of Bohemia, 385.
Microscope, improvement in, 57.
Milk tree, notice of, 370.
Mines in the Hartz, 113.
Mitchell, Prof. on the proximate causes of storms, 248.
Molecules, living, 393.
Moll, Prof. experiments on electro-magnetism by, 329.
Morphia, impurities in, 75.
Mortality of infants, 192.
Muriate of soda, decrepitation of, 198.

O.

Oil of Sweet Almonds, impurities in, 76.
—— olives, impurities in, 76.
—— Ricinus communis, impurities in, 77.
Oolite in situ, 398.
Optical Intsruments, 390.
Organism, living, 391.

P.

Penetrativeness of fluids, 360.
Pennsylvania, coal region of, 1.
Peruvian bark, adulteration of, 81.
Pfaff, Prof., theory of voltaic electricity, 178.
Phosphate of soda, impurities in, 82.
Phosphorus, preparation of, 382.
Phthisis pulmonalis in Paris, 193.
Pine timber, strength of, 228.
Plants, as affected by poisons, 172.
Populine, 380.
Porter, Prof., notice of his edition of Gray's operative chemist, 362.
Potassium, preparation of, 205.
Prussic acid, impurities in, 70.
Pyrophorus, a new kind of, 173.

R.

Rensselaer school, notice of, 151.
Roger, Theod., on preserving insects, 213.
Roman aqueducts, 389.
Rumford, Count, biographical memoir of, 28.
Ruschenberger, Dr., translation by, on plants of Chile, 63, 299.

S.

St. Lawrence county, (N. Y.) mineralogy of, 226.
Salicine, 204, 370.
Salina salt, 141.
Salisbury iron works, 322.
Salt formation, remarks upon, 141.
Salts, fusibility of, 379.
Sand, pressure of, 190.
Seleniuret of palladium, 369.
Shepard, C. U., on steel mine and iron works in Connecticut, 311.
Silk, culture of, 175.
Silver paper, imitation of, 180.
Silver works of the Hartz, 117.
Small pox, virus of, 389.
Smith, Dr., on fever, 363.
Soda, impurities in, 83.
—— bi-carbonate of, 148.
—— muriate of, impurities in, 178.
Solfaterra, connection of, with Vesuvius, 387.
Sound, concentration of, 190.
Spathic-iron ore in Connecticut, 311.
Spruce timber, strength of, 228.
Steam, elastic proof of, 181.
——— the production of, at high temperatures, 292.
Steam boats, on the safety of, 143.
—— boilers, 176, 202.
Steel, American, 175.
Steel-ore mine, 311.
Steel by cementation, 182.
Steel, Dr., on swallows, 356.
Still, large one, 394.
Storms, proximate causes of, 248.
Strong, Prof., on central forces, 46.
Sulphate of magnesia, impurities in, 84.
———— quinine, impurities in, 84.
Sulphuric acid, dilute, its action on zinc, 372.
Surveyor's compass, improvements in, 337.
Swallows, 172, 356.

T.

Tartrate of Potash and Antimony, impurities in, 86.
Thomas, Edward, on improvements in the microscope, 57.

Thomas, D. on frogs in stone, 167.
——— on physical climate, 361.
——— on coal measures in N. Y. 326.
Thomson, Dr. his analysis of anthophyllite, 359.
Thunder storms, cause of, 277.
———, in France, 191.
Trade wind, causes of, 266.
Transactions of Albany Institute, 173.

U.

Ulmus, new species of, 169.

V.

Vapor, force of at different temperatures, 201.
Vapor, the basis of the aurora borealis, 240.
Vegetable Chemistry, 380.
——— crystallizations, 177.
Vegetable physiology, 393.
Vinci, Leonardi da, on the motion of water, 397.
Vinegar, impurities in, 86.
Volatile oils, adulteration of, 77.
Voltaic electricity, theory of, 178.

W.

Water cresses, 191.
Water, decomposition of, 383.
—— in red hot vessels, 381.
Winds, proximate causes of, 248.
Woodbridge, C. annals of education by, 357.
Woodruff J. on the barn swallow, 172.

Z.

Zinc, acted upon by sulphuric acid, 372.
